

ABDELRHMAN OSAMA ELSWAH

Backend Developer • PHP • Laravel • FastAPI • Node.js • PostgreSQL • RESTful APIs

abdoelrhmanelsawah@gmail.com | +20 128 158 3343 | Cairo, Egypt | linkedin.com/in/abdelrhman-elswah

PROFESSIONAL SUMMARY

Results-driven Backend Developer with 3+ years of experience architecting and delivering 15+ production systems across e-commerce, marketplace, medical, booking, and mobile domains. Reduced high-traffic endpoint response times by up to 40% through MySQL query optimization and eager loading. Introduced reusable service-layer patterns across a 6-platform codebase, cutting duplicate code by ~30% and improving team-wide consistency. Proficient in PHP, Laravel, Codelgniter, FastAPI, Next.js, PostgreSQL, MySQL, and RESTful API design. Committed to clean architecture, SOLID principles, and business-aligned, maintainable solutions.

WORK EXPERIENCE

Laravel Developer • **Teleoceans** — Cairo, Egypt

Jul 2024 – Present

- Developed and optimized backend features for 6+ event-management platforms, introducing reusable service-layer patterns that reduced duplicate code by approximately 30% across the codebase.
- Designed and documented RESTful APIs consumed by web and mobile clients, enforcing consistent response contracts, input validation, and structured error handling — reducing API-related support tickets by ~25%.
- Refactored 4 legacy modules into clean Laravel service classes, measurably improving maintainability and reducing reported bugs in affected areas by over 50%.

PHP Developer • **Prizm Energy** — Dubai, UAE (Remote)

Sep 2023 – Jul 2024

- Built service management and user management systems from scratch for an energy-sector SaaS platform serving 3+ UAE-based enterprise clients across multiple account tiers.
- Implemented JWT-based authentication and role-based access control (RBAC) for 5 user roles, alongside secure integrations with third-party energy data APIs.
- Optimized high-load MySQL queries through strategic indexing and eager loading, improving response times on data-heavy reporting endpoints by up to 40%.
- Integrated 2 external energy data APIs, enabling real-time data delivery to the client dashboard within 200ms average latency.

Backend Developer Training • **ITI Institute** — Egypt

2022 – 2023

- Completed an intensive 6-month backend program covering Node.js, Express.js, relational database design, RESTful API architecture, and software engineering best practices.
- Delivered 3 capstone projects applying MVC architecture, SQL database design, and version control with Git.

EDUCATION

B.Sc. Computer & Control Engineering — Grade: B

2019 – 2024

Port Said University, Faculty of Engineering

- Graduation Project: Medical Diagnosis Platform — AI-powered multi-specialty disease detection backend; served as team backend lead.

TECHNICAL SKILLS

Backend	PHP, Laravel, Filament, Codelgniter, FastAPI, Node.js, Express.js, ASP.NET Core (currently studying)
Frontend	Next.js, React
APIs	RESTful Design, JWT, Sanctum, API Integration, API Versioning
Database	MySQL, PostgreSQL, Query Optimization, Indexing, Migrations
Concepts	OOP, MVC, SOLID, Clean Code, Microservices, Event-Driven Architecture, Agile / Scrum
Tools	Git, GitHub, Docker, CI/CD, Postman, Composer, Linux
Languages	Arabic (Native) • English (Intermediate)

KEY PROJECTS

PlanChecker — UK Building Control Marketplace • planchecker.co.uk *Next.js • Laravel • Filament • Stripe*

- Single-handedly designed, built, and launched the UK's first platform connecting clients, developers, and Registered Building Inspectors (RBIs) for verified plan checks, inspections, and consultations.
- Delivered the entire stack solo — Next.js frontend, Laravel RESTful API backend, and Filament admin dashboard — including job posting and bidding, a verified RBI directory (Class 1–4 competencies, Building Safety Act), milestone-based Stripe payments, and live chat support.

FanFeed — Creator & Music Platform (in development) *Python • Microservices • Event-Driven Architecture*

- Architecting an 11-service microservices platform (identity, catalog, payments, video, social) in a single Python monorepo, applying database-per-service isolation and the transactional outbox pattern for reliable cross-service events.
- Enforcing strict service boundaries through automated CI quality gates — linting, type checks, boundary/isolation validation, and migration checks — under a spec-driven development workflow with ADRs and endpoint contracts.

Medical Diagnosis Platform *Laravel • MySQL • AI Service Integration*

- Led full backend development as team backend lead; built AI-powered detection engine for brain, chest, eye, and X-Ray diseases.
- Implemented user diagnosis history and a doctor recommendation engine, processing 4 disease categories from integrated AI models.

Ersums+ Egypt — Digital Marketing Platform *FastAPI • PostgreSQL*

- Built from the ground up using FastAPI and PostgreSQL; delivered a service catalog, client order tracking, and dual vendor/client portals for Egypt's creative services market.
- Designed project delivery workflows reducing average client onboarding time by an estimated 35%.

Go4Retails — B2B Retail Distribution *Laravel • MySQL • Multi-vendor APIs*

- Engineered multi-vendor inventory management, order routing, and wholesale pricing engine connecting suppliers and retailers at scale.

Locally — Local Business Discovery *Laravel • Geolocation APIs • MySQL*

- Built geolocation-aware proximity search and store-ranking backend enabling users to discover and shop from nearby local businesses.

E-commerce Platforms — Aboelseed • Elmwrain • Steren *Laravel • PHP • MySQL*

- Delivered product catalog, order pipelines, and account management systems for fashion, automotive, and general retail; collectively serving thousands of SKUs.

Booking & Service Apps — Lilytours • Unitz • Hand-Co • LeCaire *Laravel • CodeIgniter • MySQL*

- Built booking engines, availability management, and service-routing workflows for tourism, real estate, pet care, and contracting platforms.

Mobile App Backends — Fuse • Dp • Chopped *Laravel • RESTful APIs*

- Developed API backends powering iOS/Android apps: authentication flows, real-time data synchronization, and push notification integration for 3 consumer applications.

KEY ACHIEVEMENTS

- Delivered 15+ production-grade projects across 4 industries and multiple tech stacks within 3 years.
- Single-handedly built and launched PlanChecker (planchecker.co.uk) — the UK's first building-control marketplace.
- Implemented secure multi-role authentication (JWT / Sanctum) across 8+ platforms with zero reported auth breaches.
